

FOR IMMEDIATE RELEASE,

Port of Spain, Trinidad & Tobago,

INGENIUM begins their search for Executives!

What happens when you take a top down approach to job placement? Ingenium happens! The brainchild of Ena Vieira, a returning national of Trinidad and Tobago with over 15 years in the field of Recruitment.

“It’s not about holding a huge database of workers and placing them into jobs, that’s not how I work” said Ena, “I am a head hunter, I listen to the Corporate Client and find them the ideal match for the job!”

Ena has been taking a critical look at the Recruitment field in Trinidad and Tobago and brings a fresh and very international eye to how things are done. Her style and experience is in finding the ideal mixture of Experience, Education, Salary Expectations and doing thorough back ground checks – a module she perfected in the United Kingdom that will protect and enrich the HR here in Corporate Trinidad and Tobago more than anything else.

The company has now opened its doors and promises to change the way we think about the recruitment process.
